# Mathematics test

## Paper 2

### Calculator allowed

First name \_\_\_\_\_

Last name \_\_\_\_\_

School \_\_\_\_\_

#### Remember

- The test is 1 hour long.
- You may use a calculator for any question in this test.
- You will need: pen, pencil, rubber, ruler and a scientific or graphic calculator.
- Some formulae you might need are on page 2.
- This test starts with easier questions.
- Try to answer all the questions.
- Write all your answers and working on the test paper – do not use any rough paper. Marks may be awarded for working.
- Check your work carefully.
- Ask your teacher if you are not sure what to do.

2009

## Instructions

### Answers

This means write down your answer or show your working and write down your answer.

### Calculators

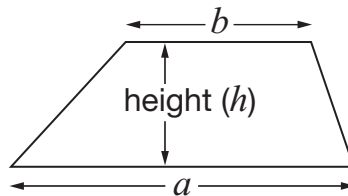

You **may** use a calculator to answer any question in this test.

## Formulae

You might need to use these formulae

### Trapezium

$$\text{Area} = \frac{1}{2}(a + b)h$$

### Prism

area of cross-section

$$\text{Volume} = \text{area of cross-section} \times \text{length}$$

1. The diagram shows a right-angled triangle.

P, Q and R are the **midpoints** of the sides of the triangle.

Work out the coordinates of P, Q and R.

 P is ( \_\_\_\_\_ , \_\_\_\_\_ )

\_\_\_\_\_ 1 mark

 Q is ( \_\_\_\_\_ , \_\_\_\_\_ )

\_\_\_\_\_ 1 mark

 R is ( \_\_\_\_\_ , \_\_\_\_\_ )

\_\_\_\_\_ 1 mark

2. The table shows information about the rainfall in two places in South America.

| Place | Season | Mean rainfall  | Number of months | Months      |
|-------|--------|----------------|------------------|-------------|
| A     | Dry    | 10cm per month | 8                | Jan to Aug  |
|       | Wet    | 20cm per month | 4                | Sept to Dec |
| B     | Dry    | 5cm per month  | 10               | July to Apr |
|       | Wet    | 50cm per month | 2                | May to June |

Which of the places has **more rainfall** on average over the whole year?

Show working to explain your answer.

Tick (✓) your answer.

 A B

2 marks

3. The distance needed for a car to stop depends on how fast the car is travelling. This distance can be calculated by adding the thinking distance and the braking distance.

For example: at **30 miles per hour**

Here are the formulae to work out the thinking distance and the braking distance for a car travelling at  $V$  miles per hour.

$$\text{Thinking distance} = V \text{ feet} \quad \text{Braking distance} = \frac{V^2}{20} \text{ feet}$$

- (a) A car is travelling at **70 miles per hour**.

What is the **total stopping distance** for this car?

\_\_\_\_\_ feet

\_\_\_\_\_   
 2 marks

- (b) A different car is travelling so that its **braking distance** is **125 feet**.

How fast is the car travelling?

\_\_\_\_\_ miles per hour

\_\_\_\_\_   
 1 mark

4. Shape A and shape B are each made from five identical squares.

A

B

Not drawn  
accurately

The **perimeter** of shape A is **72cm**.

Work out the **perimeter** of shape B.

\_\_\_\_\_ cm

\_\_\_\_\_

2 marks

5. In one year, **2 million tonnes** of glass bottles and jars were thrown away in the UK.

**38%** of these bottles and jars were recycled.

**How many tonnes** of the bottles and jars were recycled?

\_\_\_\_\_ tonnes

\_\_\_\_\_

2 marks

6. (a) Look at the equilateral triangle.

Each angle in an equilateral triangle is  $60^\circ$

Explain why.

Isometric grid

1 mark

(b) Now look at this shape.

Work out the sizes of angles  $a$ ,  $b$  and  $c$

Isometric grid

$a =$  \_\_\_\_\_  $b =$  \_\_\_\_\_  $c =$  \_\_\_\_\_

2 marks

7. A teacher has five bags containing only red and blue counters.  
The table shows how many red and blue counters are in each bag.

|               | Bag |   |   |   |   |
|---------------|-----|---|---|---|---|
|               | A   | B | C | D | E |
| Red counters  | 6   | 6 | 6 | 6 | 6 |
| Blue counters | 6   | 5 | 4 | 3 | 2 |

The teacher is going to take a counter at random from each bag.

Match each bag with the correct probability of taking a **blue** counter below.

The first one is done for you.

| Bag | Probability of taking a <b>blue</b> counter |
|-----|---|
| A   | $\frac{1}{4}$                               |
| B   | $\frac{1}{3}$                               |
| C   | $\frac{1}{2}$                               |
| D   | $\frac{5}{11}$                              |
| E   | $\frac{2}{5}$                               |

A line connects Bag A to the probability  $\frac{1}{2}$ .

\_\_\_\_\_

2 marks

8. In a survey, pupils were asked if they owned a bicycle.

Results:

$\frac{3}{8}$  of the pupils said 'Yes'.

$\frac{5}{8}$  of the pupils said 'No'.

**46 more** pupils said 'No' than said 'Yes'.

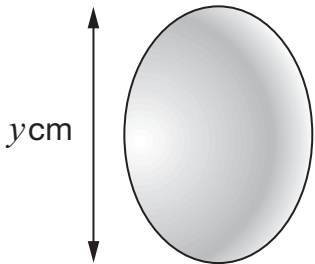

Altogether, how many pupils were in the survey?

2 marks

9. In this question you will need the following information about hens' eggs.

Approximate **mass**, in grams, is given by:

$$\text{Mass} = \frac{\pi y^3}{10} \times 1.15$$

| Mass of egg   | Grade of egg |
|---------------|--------------|
| Up to 53g     | Small        |
| 53g up to 63g | Medium       |
| 63g up to 73g | Large        |
| 73g or more   | Extra large  |

The length,  $y$ , of an egg is **5.5cm**.

Use the formula to find the **grade** of the egg.

You **must** show your working.

Grade \_\_\_\_\_

2 marks

10. A shop sells rings of different sizes.

The diagram shows the diameters of the different sizes.

(a) What is the circumference of a **size 8** ring?

1 mark

(b) Rachel wants to buy a ring for her middle finger.

That finger has a circumference of **51 mm**.

What size ring should she buy?

Show working to explain your answer.

Tick (✓) your answer.

|                          |        |                          |        |                          |        |                          |        |                          |        |
|--------------------------|--------|--------------------------|--------|--------------------------|--------|--------------------------|--------|--------------------------|--------|
| <input type="checkbox"/> | size 5 | <input type="checkbox"/> | size 6 | <input type="checkbox"/> | size 7 | <input type="checkbox"/> | size 8 | <input type="checkbox"/> | size 9 |
|--------------------------|--------|--------------------------|--------|--------------------------|--------|--------------------------|--------|--------------------------|--------|

2 marks

11. Look at this calculation.

$$3^5 + 10^2 = 7^x$$

Find the value of  $x$ .

You **must** show your working.

$$x = \underline{\hspace{2cm}}$$

2 marks

12. The table below shows the number of schools and the number of pupils in England.

|           | Number of schools | Total number of pupils |
|-----------|-------------------|------------------------|
| Primary   | 17 642            | 4 069 385              |
| Secondary | 3 385             | 3 315 805              |

Show that, on average, a secondary school has about **four times** as many pupils as a primary school.

2 marks

13. The cuboid container below holds **12 litres** of water when full.  
One litre is  $1000\text{cm}^3$   
The inside length and width of the cuboid are **40cm** and **20cm**.

What is the inside **height** of the cuboid?

Height = \_\_\_\_\_ cm

\_\_\_\_\_  
2 marks

14. The first three terms of a sequence are shown in the box.

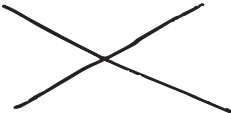

5, 16, 27, ...

Look at each expression below.

Write 'No' if it could **not** be the  $n$ th term expression for this sequence.

Write 'Yes' if it could be the  $n$ th term expression for this sequence and then work out the **4th** term.

The first one is done for you.

| Expression   | Could it be the $n$ th term expression? | If 'Yes', work out the 4th term   |
|--------------|---|---|
| $5n$         | No                                      |  |
| $n + 11$     |   |   |
| $11n - 6$    |   |   |
| $n^2(6 - n)$ |   |   |

15. There are 6 units in an exam course.

Each unit is marked out of 100

To get grade A, the **mean** mark of all six units must be at least **80**

Tom has taken five units. His mean mark is **78**

To get grade A, how many marks must he get on the last unit?

\_\_\_\_\_

\_\_\_\_\_

2 marks

16. (a) The grid shows a straight line.  
The equation of the line is  $y = x$

**Two** of the equations below also describe the straight line  $y = x$

Put rings round the correct equations.

$x = y$

$y = -x$

$yx = 0$

$x - y = 0$

$x + y = 0$

1 mark

- (b) Write the coordinates of two points that have an  $x$  coordinate that is one less than the  $y$  coordinate.

( \_\_\_\_\_ , \_\_\_\_\_ )      ( \_\_\_\_\_ , \_\_\_\_\_ )

What would be the equation of the straight line through these two points?

\_\_\_\_\_

1 mark

17. In 2004 a newspaper published this **incorrect** report:

Houses cost £60 000 one year ago.

They now cost £80 000

This is a 25% increase.

Write the missing numbers below to make each statement correct.

- (a) Houses cost £60 000 one year ago.

They now cost £ \_\_\_\_\_

This is a 25% increase.

\_\_\_\_\_ 1 mark

- (b) Houses cost £60 000 one year ago.

They now cost £80 000

This is a \_\_\_\_\_ % increase.

\_\_\_\_\_ 1 mark

- (c)  Houses cost £ \_\_\_\_\_ one year ago.

They now cost £80 000

This is a 25% increase.

\_\_\_\_\_ 1 mark

18. Here are some number cards with the values written in standard form.

$$2 \times 10^4$$

$$2 \times 10^6$$

$$2 \times 10^8$$

$$2.5 \times 10^4$$

$$2.5 \times 10^6$$

$$2.5 \times 10^8$$

Two of the number cards **multiply** to give  $5 \times 10^{16}$

Write them in the calculation below.

$$\boxed{\phantom{000000000000000000}} \times \boxed{\phantom{000000000000000000}} = 5 \times 10^{16}$$

1 mark

19. (a) Look at this equation:

$$c + 3 = d - 4$$

Which of  $c$  and  $d$  is greater, and by how much?

\_\_\_\_\_, by \_\_\_\_\_

\_\_\_\_\_ 1 mark

(b) Look at this equation:

$$3 - e = 4 - f$$

Which of  $e$  and  $f$  is greater, and by how much?

\_\_\_\_\_, by \_\_\_\_\_

\_\_\_\_\_ 1 mark

20. Look at this information from January 2005.

**546 400**, or **98%** of all 3-year-old children in England go to play school or nursery, or have some other type of education.

To the **nearest thousand**, how many 3-year-old children were there in England?

\_\_\_\_\_

\_\_\_\_\_

21. The diagram shows a right-angled triangle.

Not drawn accurately

What is the value of  $h$ ?

$$h = \underline{\hspace{2cm}}$$

2 marks

22. A town in the south of England has the lowest ratio of men to women in England.  
There were only 87 men for every 100 women.

| Men | Women |
|-----|-------|
| 87  | 100   |

**For every 100 men**, how many women were there?

Give your answer to the nearest integer.

| Men | Women |
|-----|-------|
| 100 | _____ |

\_\_\_\_\_

2 marks

23. The numbers of petals that daisies have can vary.

The box plot shows information about the petals for a sample of daisies.

(a) For the sample of daisies, what is the median number of petals?

\_\_\_\_\_

1 mark

(b) For the sample of daisies, what is the **inter-quartile range** of the number of petals?

\_\_\_\_\_

1 mark

(c) What percentage of the daisies in the sample has **fewer than 30** petals?

\_\_\_\_\_ %

1 mark

24. Here is a trapezium.

Not drawn accurately

Use Pythagoras' theorem to find the value of  $k$

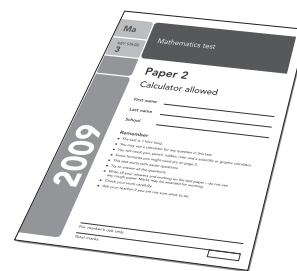

$$k = \underline{\hspace{2cm}}$$

2 marks

**25.** A booklet is made from **6** rectangular pieces of paper.  
 Each piece of paper measures **297 mm** by **420 mm**.  
 The mass of the paper is **80 g per m<sup>2</sup>**

Calculate the mass of the booklet.

Give your answer correct to **2 significant figures**.
